 <https://github.com/inkwanglee/Network-Security-Portfolio>

SKILLS

Cybersecurity: SIEM (Wazuh), IDS/IPS (Snort), MITRE ATT&CK Framework, Vulnerability Assessment (Nmap, OpenVAS), Network Security, Incident Detection, SOC Operations

Programming: Python (Advanced), Bash/PowerShell Scripting, SQL, C, JavaScript

Security Tools: Metasploit, Wireshark, Burp Suite, Nginx, mitmproxy, iptables

Networking: TCP/IP, VLANs, Firewalls, Proxy Configuration, Network Segmentation

Systems: Linux (Ubuntu, Kali), Windows Server, Virtualization (VirtualBox)

Other: Git, Docker, Cloud Computing (AWS basics), Elasticsearch

Soft Skills: Attention to Detail (Security Compliance), Analytical & Critical Thinking, Clear Communication, Cross-functional Teamwork, Technical Documentation, Proactive Learning Mindset

PROFESSIONAL SUMMARY

Motivated IT student specializing in Network Security and Defensive Cybersecurity, graduating July 2026 from QUT with a Minor in Network and Security. Proven hands-on experience with SIEM platforms (Wazuh), intrusion detection systems (Snort), MITRE ATT&CK framework, and Python automation, documented in public portfolio at github.com/inkwanglee/Network-Security-Portfolio. Seeking to apply security operations skills in a SOC environment. My passion for cybersecurity originated from managing classified military documents during national service, where I developed a deep appreciation for security protocols and risk management.

WORK HISTORY

Ignite PC Cafe - IT Support Staff

Macgregor, QLD • 01/2025 - Current

- Provide technical support for 40+ gaming PCs including server management, network troubleshooting, and hardware diagnostics
- Resolved boot issues, network connectivity problems, and user access configurations
- Maintained system uptime and customer satisfaction through quick incident response

Mokkoji Korean BBQ - Hall Staff

Mount Gravatt, QLD • 08/2023 - 01/2025

- Provided exceptional customer service in fast-paced environment
- Collaborated effectively with diverse team members
- Demonstrated reliability and strong work ethic valued by supervisors

Republic of Korea Army - Classified Document Management Specialist

Pocheon, Korea • 09/2019 - 04/2021

- Managed military security classified documents (levels 2-3) for brigade-level operations
- Maintained document lifecycle including creation, distribution, tracking, and secure disposal
- Coordinated CEOI (Communication-Electronics Operating Instructions) distribution and radio communication network management
- Successfully passed corps-level security audit through meticulous record-keeping and compliance protocols

Developed strong attention to detail and understanding of security protocols - the foundation of my cybersecurity career passion

LANGUAGES

Korean

English

Professional Working

AVAILABILITY

Immediately available for part-time work

VISA STATUS

Student Visa (expires August 2026), eligible for Graduate Visa post-graduation

EDUCATION

Queensland University of Technology

Brisbane, QLD • Expected in 07/2026

Bachelor of Science: Computer Science Major, Network And Security Minor

Network Security Control Deployment & SIEM Integration | CAB441

Major Assignment (40/40) *October 2025*

- Conducted comprehensive vulnerability scanning and prioritization using Nmap and NVD database against Metasploitable 2 environment
- Deployed and configured Snort IDS with custom detection rules for ICMP reconnaissance, SSH brute force, port scanning, and DDoS attacks
- Implemented Wazuh SIEM for centralized log management and real-time threat correlation across multiple endpoints
- Mapped security events to MITRE ATT&CK framework (T1110.003, T1566.001) with threat intelligence integration
- Designed complementary security controls including fail2ban automation, network segmentation, and EDR integration

Intrusion Detection System Configuration | CAB441

- Developed 4 custom Snort rules detecting: ICMP traffic, SSH brute force (threshold-based), port scanning (SYN flood), and ICMP DDoS
- Configured multi-format logging (alert_full, alert_fast, CSV) for SIEM integration
- Automated alert frequency analysis using bash scripting (grep, awk, sort, uniq)

Reverse Proxy & Content Filtering Implementation | CAB441

- Configured Nginx reverse proxy with TLS/HTTPS encryption for WikiJS application
- Implemented mitmproxy for forward proxy with certificate-based HTTPS inspection and content filtering
- Demonstrated understanding of CIA triad through practical security architecture
